

## About the authors

### Kunda Dixit

Kunda Dixit is a Nepali journalist and graduate of Columbia University. He worked as news reporter for the BBC at UN Headquarters in New York, and then as Asia-Pacific director of Inter Press Service. He returned to Nepal in 1996 to head Panos Institute South Asia, and is currently editor and publisher of *Nepali Times* and the *Himal* magazine in Kathmandu.

### Dr. Saleemul Huq

Saleemul Huq is a leading environmental planner, having been executive director of the Bangladesh Centre for Advanced Studies from its inception in 1984 until 2000. He has been involved in assisting national environmental planning in numerous developing countries and is an international advisor of the Capacity 21 programme of UNDP. He has also assisted many developing countries in preparing national communications on the impacts of climate change, and their national strategies for sustainable development. He obtained his first degree and PhD in biological sciences from Imperial College in London, and is currently director of the Climate Change Programme at the International Institute for Environment and Development in London.

### Dr. Hafiz Pasha

Hafiz Pasha is assistant secretary-general and director of the UNDP Regional Bureau for Asia and the Pacific. Prior to joining UNDP, he was managing director of the Social Policy and Development Centre in Pakistan. Previously, he has held major policy and ministerial appointments with the government of Pakistan, including minister for finance and economic affairs, education minister and commerce minister, as well as deputy chairperson of the Planning Commission. In these roles, he has served as a top advisor to three governments on major issues of economic development, fiscal and trade policy and poverty reduction strategy. He has also been president and vice chancellor of the University of Karachi, as well as dean and director of the Institute of Business Administration, Karachi. Dr. Pasha holds an MA in economics from Trinity College, Cambridge University, and a PhD in economics from Stanford University.

### Dr. Atiq Rahman

Atiq Rahman is executive director of the Bangladesh Centre for Advanced Studies. He also co-ordinates the Global Forum on Environment and Poverty and is convenor of Climate Action Network South Asia. Dr. Rahman is chairperson of the Coalition of Environmental NGOs in Bangladesh, as well as of the Steering Committee of Asia-Pacific National Councils for Sustainable Development, based in Manila. He is the Bangladesh focal point for the South Asian Poverty Commission. Besides his work in Bangladesh and Asia, Dr. Rahman has been a research associate at Fletcher School of Law and Diplomacy, Tufts University, Massachusetts, since 1996. He was also a faculty member of the International Programme on the Management of Sustainability for the Sustainability Challenge Foundation in the Netherlands. He has designed, developed and teaches (1999 and 2000) a multi-disciplinary post-graduate course on sustainable

development challenges and North-South dialogue at Massachusetts Institute of Technology (MIT), in the Department of Urban Studies and Planning, Massachusetts. He is also a reviewer of the World Energy Assessment (1999) by the World Energy Council, UNDP and UNEP, and a lead author of the South Asian intergovernmental policy paper for the 2002 World Summit on Sustainable Development.

**Jorge L. Reyes**

Jorge L. Reyes is an environment specialist with 18 years experience in policy formulation and advocacy, programme development and management, and capacity building, mainly in environmental and natural resources management areas. Until recently, he was working with the UNDP country office in Manila, as Sustainable Development Advisor. In this capacity, he was directly involved in national and regional initiatives to implement the recommendations of the 1992 UN Conference on Environment and Development. The main outcomes of his efforts include the formation of the Philippine Council for Sustainable Development, organization of the Philippine Sustainable Development Network, formulation of Philippine Agenda 21 and Business Agenda 21. He obtained his bachelor's and master's degrees in forestry, majoring in economics and policy, from the University of the Philippines, and had a brief graduate training attachment at the Science Policy Research Unit of the University of Sussex in the UK. He is now engaged in independent international consulting and has provided technical advisory services in the fields of environment and sustainable development to several development organizations operating in Asian and African countries.

**Professor Liu Yi**

Professor Liu Yi is a leading regional development and resources planner in China. He has assisted in the development and implementation of many national and local Agenda 21 programmes and strategies for sustainable development. He is currently deputy director of the Institute of Geographic Sciences and Natural Resources Research of the Chinese Academy of Sciences in Beijing.

### **About Capacity 21**

Launched at the Earth Summit in 1992, **Capacity 21** is an innovative initiative that helps developing countries and countries in transition strengthen the capacities of key development actors to integrate the principles of Agenda 21 into national and local efforts for sustainable development.

**Capacity 21** provides a unique type of assistance. It promotes participatory, integrated and decentralized approaches to assist countries in planning and implementing holistic strategies for sustainable development.

Working in close partnership with governments, civil society and the private sector, **Capacity 21** programmes are country-owned, country-driven processes that influence and support national and local policy- and decision-making to build real, long-lasting capacities for sustainable development at all levels of society.
